# Integrated Policy - Quality, Safety, and Environment

Cabiran specialize in the **manufacture and sale of precision aluminum castings manufactured using the lost wax method.** Cabiran's management considers product quality, employee safety, and environmental protection as core pillars of its operations. We operate an integrated management system that complies with **ISO 9001, AS 9100, ISO 14001, and ISO 45001,** including the definition of goals & targets, implementation, evaluation, continual improvement, and adaptation to business and technological changes. The policy is derived from Cabiran's organizational context and reflects the needs and expectations of customers, employees, regulatory bodies, and other stakeholders. We apply a risk-based approach, continuously identifying risks and opportunities to ensure the achievement of business, quality, environmental, and safety objectives.

## 🔧 Quality (ISO 9001 & AS 9100):

- Manufacture of high-quality products that meet customer, regulatory, and aerospace, aviation, and defence standards.
- Encouraging employee involvement and empowerment to achieve quality objectives and maintain strict control throughout production.
- Ensuring product safety and reliability across the product lifecycle, including configuration management traceability, and documentation.
- Applying a risk-based approach in decision-making and management of risks and opportunities.
- Timely response to customer complaints and implementation of preventive actions.
- Flow-down of quality requirements to suppliers and subcontractors.

## 🌍 Environment (ISO 14001):

- Minimizing environmental impact, responsible resource use, and pollution prevention.
- Reducing waste and promoting sustainability to safeguard future generations.
- Compliance with environmental laws, regulations, and standards.
- Raising employee awareness to their environmental responsibilities.
- Identifying risks and opportunities, including **climate change** and its potential effects on operations and infrastructure.

## 🛡️ Occupational Health and Safety (ISO 45001):

- Ensuring a safe and healthy workplace for employees, contractors, and visitors.
- Compliance with applicable laws, regulations, and standards related to occupational health and safety.
- Promoting a safety culture through proactive risk identification and management.
- Engaging employees in safety decisions and encouraging reporting and learning from incidents.

## 📌 Management Commitment:

Cabiran's management is committed to implementing this policy transparently, allocating necessary resources, enabling effective communication internally and externally, and continually improving the Integrated Management System.
